The Fight To Stay Put

Social Lessons through Media Imaginings of Urban Transformation
and Change

Media Geography at Mainz – Volume 3

The fights to stay put can be seen as representations of struggles for social justice as they relate to place. On the other, they can be seen as the inevitable non-representational outcomes of territorial conflicts where fights for and over affective connections to place clash with those seeking monetary profit and power through re-productions of space. Media provides a particularly illuminating window into such fights and the social lessons that can be learned from them because of its ability to readily reveal intersecting narratives and wider processes impacting and composing place. The trajectories of these fights and how they work through different concrete and imagined media landscapes form the basis of this book.

Contents
