Leibniz and the European Encounters with China

300 Years of *Discours sur la théologie naturelle des Chinois*

STUDIA LEIBNITIANA – SONDERHEFT 52

W. Leibniz' writings on China, particularly his *Discours sur la théologie naturelle des Chinois* (1715/1716), count among the most important works of this global thinker. There have been a growing number of editions and translations of the texts – from Chinese to Portuguese.

The present volume contains papers of the scholarly conference that took place in 2015 on the occasion of the 300th anniversary of Leibniz' writing the *Discours*. The editor and associates, in the spirit of the conference, have collected and presented the individual contributions with the hope of initiating research in a field that still awaits further exploration.
