

Table of contents

I. General notions on magic squares	1
Note on the history of magic squares	4
II. The ancient work preserved	9
A. Manuscripts	9
Manuscript \mathcal{A}	9
Manuscript \mathcal{D}	11
B. Brief survey of the treatise	13
III. Text and translation	15
Introduction	17
Bordered odd-order squares	19
Examples	27
Bordered odd-order squares with separation by parity	31
Placing the odd numbers	31
Placing the even numbers	41
Square of order 5	55
Squares of orders $n = 4t + 1$, $t > 1$	57
Squares of orders $n = 4t + 3$	71
Examples	77
Bordered even-order squares	89
Square of order 4	89
Bordered squares of orders $n = 4k + 2$	91
Bordered squares of orders $n = 4k$	95
Examples	101
Composite even-order squares	105
Theory	105
Examples	125
Division into equal subsquares	125

Division into unequal parts	139
Cross in the middle	155
IV. General commentary	163
Introduction	163
Construction of odd-order bordered squares	165
Odd-order bordered squares with separation by parity	174
A. Placing the odd numbers	177
B. Placing the even numbers	183
C. Completing the squares for the three order types	188
Square of order 5	188
Squares of orders $n = 4t + 1, t > 1$	189
Squares of orders $n = 4t + 3$	197
Construction of even-order bordered squares	204
Square of order 4	204
A. Bordered squares of evenly-odd orders ($n = 4k + 2$)	205
B. Bordered squares of evenly-even orders ($n = 4k$)	209
Construction of even-order composite squares	213
A. Division into equal subsquares	214
B. Division into unequal parts	215
C. Cross in the middle	216
Arabic glossary	221
Greek glossary	229
Bibliography	231
Index	233
